## INVESTMENT OBJECTIVE & STRATEGY

The Fund seeks long-term capital growth through an actively managed portfolio of international stocks. The Fund's investment process focuses on security selection and portfolio construction. The Adviser's goal is to construct a diversified portfolio of reasonably valued stocks of higher quality companies.

### Security Selection

The Adviser seeks to identify and invest in companies that exhibit higher quality business and financial characteristics. The Adviser considers higher quality companies to be those judged to have financial stability, prudent capital management, and financial statements that indicate economic success. Using both quantitative and qualitative assessments, the Adviser seeks to highlight firms for investment primarily on the basis of business stability, profitability, balance sheet sustainability, accounting practices, and growth opportunities. The goal is to identify companies that exhibit a quality profile judged by the Adviser to be desirable relative to the universe and each company's sector and country peers.

### Portfolio Construction

The Fund's primary consideration is investing in higher quality companies that meet Boston Trust Walden's established ESG guidelines. The Fund's investments, in aggregate, possess portfolio characteristics the Adviser judges to be superior to those of international developed markets. The Fund is broadly diversified across economic sectors, countries, and currencies with weightings generally comparable to those of the international developed markets. The Fund's holdings, in aggregate, will have valuation characteristics that are, in the Adviser's judgment, comparable or better than those of an international developed market proxy.

### Environmental, Social, and Governance Guidelines

The Fund evaluates financially material ESG factors as part of the investment decision-making process, considering a range of impacts they may have on future revenues, expenses, assets, liabilities, and overall risk. The Fund excludes companies with significant exposure in specific products or services, as well as those deemed to have substandard ESG performance as described in the Prospectus. The Fund also utilizes active ownership to encourage more sustainable business policies and practices and greater ESG transparency. Active ownership strategies include proxy voting, dialogue with company management and sponsorship of shareholder resolutions, and public policy advocacy.

The Fund invests in foreign securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. The Fund's environmental, social, and governance (ESG) policies could cause it to perform differently compared to similar funds that do not have such a policy. This policy may result in the Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, or selling securities for reasons when it might be otherwise disadvantageous for it to do so. Diversification does not assure a profit or protect against a loss in a declining market.
