INVESTMENT OBJECTIVE & STRATEGY

The Fund seeks long-term capital growth through an actively managed portfolio of stocks of small capitalization companies. The Fund's investment process focuses on security selection and portfolio construction. The Adviser's goal is to construct a diversified portfolio of reasonably valued stocks of higher quality companies.

Security Selection

The Adviser uses both quantitative methods and qualitative analysis to identify companies of higher financial quality relative to the market. The Adviser's assessment of quality includes a comprehensive review of financial statements and their footnotes, focusing on a company's profitability and cash generation, stability, balance sheet sustainability, growth, and earnings quality. The Adviser targets firms with sustainable business models, including a strong competitive position, favoring market leaders with distinct products or services, whose stocks trade at a reasonable valuation.

Portfolio Construction

The Fund's investments, in aggregate, possess portfolio characteristics the Adviser judges to be superior to those of the small cap market. The Fund is broadly diversified across economic sectors with weightings generally comparable to the Russell 2000® Index.

Environmental, Social, and Governance Guidelines

The Fund evaluates financially material ESG factors as part of the investment decision-making process, considering a range of impacts they may have on future revenues, expenses, assets, liabilities, and overall risk. The Fund excludes companies with significant exposure in specific products or services, as well as those deemed to have substandard ESG performance as described in the Prospectus. The Fund also utilizes active ownership to encourage more sustainable business policies and practices and greater ESG transparency. Active ownership strategies include proxy voting, dialogue with company management and sponsorship of shareholder resolutions, and public policy advocacy.

Performance data for three years and longer is annualized. Performance represents Fund shares indicated at net asset value (NAV). Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and NAV will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The index returns reflect neither the deduction of fees and expenses associated with a mutual fund nor the impact of taxes.

SECTOR ALLOCATION

20 YEAR UP CAPTURE & DOWN CAPTURE

The chart below right illustrates how the Fund has performed relative to an index in up and down markets, measured quarterly, over the last 20 years. For example, the Fund has a down capture ratio of 73% over this period, meaning that the Fund lost 27% less than the index, on average, during periods in which index returns were negative.

FUND RISKS

Equity securities (stocks) are generally more volatile and carry more risk than fixed income securities (bonds) and money market investments. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater returns over long time periods than fixed income securities. The Fund is comprised primarily of equity securities and is subject to market risk. Stocks may decline due to general market and economic conditions or due to company specific circumstances. The Fund is comprised of small-capitalization (“small cap”) stocks. Small cap stocks typically carry additional risk, since smaller companies generally have a higher risk of failure, and historically have experienced a greater degree of volatility.

ADDITIONAL DISCLOSURES

The Walden Small Cap Fund was reorganized into the Boston Trust Walden Small Cap Fund on April 3, 2020. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. ² Reflects the expense ratio as reported in the prospectus dated May 1, 2021. The Fund has no sales charge and the gross expense ratio is 1.06% and the net expense ratio is 1.00%, due to expense reimbursement. The Fund’s Advisor has contractually agreed to limit fees and waive certain expenses through May 1, 2022. ³ Reflects the annual portfolio turnover as reported in the prospectus dated May 1, 2021. ⁴ Definitions: Sales and ROIC (Return on Invested Capital) Variability measure fluctuations in the respective metrics of the Fund or benchmark companies during a given period. Price/Earnings Ratio measures a company’s current share price compared to its per-share earnings. Free Cash Flow Yield excludes the financials sector.

The quoted performance for the Fund reflects the performance of a collective investment fund that was previously managed with full investment authority by the parent company of the Funds’ Adviser prior to the establishment of the Fund on December 16, 2005. The performance of the collective investment fund has been restated to reflect the net expenses of the Fund after all expenses at an annual rate of 1.25%.

Please read the statutory prospectus or summary prospectus carefully before investing.
