INVESTMENT OBJECTIVE & STRATEGY

Investment Objective

The Fund seeks long-term capital growth through an actively managed portfolio of stocks.

Investment Strategy

The Fund's investment process focuses on security selection and portfolio construction. The Adviser seeks to construct a diversified portfolio of reasonably valued stocks of higher quality companies.

Security Selection

The Adviser seeks to identify and invest in companies that exhibit higher quality business and financial characteristics. The Adviser considers higher quality companies to be those judged to have sustainable business models, financial stability, prudent capital management, and financial statements that indicate past economic success. Using both quantitative and qualitative assessments, the Adviser seeks to highlight firms for investment primarily on the basis of business stability, profitability, balance sheet sustainability, accounting practices, and growth opportunities. The goal is to identify companies that exhibit a quality profile judged by the Adviser to be desirable relative to the universe and each company's sector peers.

Portfolio Construction

The Fund's investments, in aggregate, will be reasonably valued and possess portfolio characteristics the Adviser judges to be superior to those of the market. The Fund is broadly diversified across economic sectors.

Performance data for three years and longer is annualized. Performance represents Fund shares indicated at net asset value (NAV). Reflects the expense ratio as reported in the prospectus dated May 1, 2022. The Fund has no sales charge and the gross expense ratio is 0.85%. The Adviser annually executes an expense limitation agreement and the Fund net expenses are currently (and have historically been) limited to 1.00%. The index returns reflect neither the deduction of fees and expenses associated with a mutual fund nor the impact of taxes.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and NAV will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Future performance may be lower or higher than the performance quoted. To obtain performance information current to the most recent month end, please call 1-800-282-8782.

RISK & RETURN COMPARISON SINCE FUND INCEPTION

The above chart illustrates the risk/return trade-off of the Fund relative to the index since the Fund's inception. In the illustration, risk is measured as the annualized standard deviation of monthly returns over the time period. The standard deviation is used as a measure of investment risk, and measures the degree of variation of returns around the average return. The higher the volatility of the returns, the higher the standard deviation.

FUND RISKS

Equity securities (stocks) are generally more volatile and carry more risk than fixed income securities (bonds) and money market investments. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater returns over long time periods than fixed income securities. The Fund is comprised primarily of equity securities and is subject to market risk. Stocks may decline due to general market and economic conditions or due to company specific circumstances.

INDEX DEFINITIONS

The S&P 500 is representative of the investible universe of US large capitalization companies.
