## INVESTMENT OBJECTIVE & STRATEGY

The Fund seeks long-term capital growth and income through an actively managed portfolio of equity and fixed income securities. The Fund's investment process focuses on asset allocation, segment composition, and security selection. The Adviser seeks to construct a diversified portfolio of reasonably valued equity and fixed income securities of high quality companies and issuers that meet the Fund's environmental, social and governance ("ESG") guidelines.

### Asset Allocation

Asset allocation can be the foremost determinant of total portfolio return in most market environments. Moreover, tactical shifts among asset classes can enhance returns and reduce risk over time. Using quantitative and qualitative inputs to forecast asset class returns over a range of US and global economic scenarios, the Adviser sets policy to produce a prudent risk-return portfolio.

### Segment Composition

Within both the equity and fixed income segments, the Adviser makes judgments about portfolio composition intended to both enhance return and manage risk. These judgments include considerations such as sector allocation and portfolio duration.

### Security Selection

**Equity**—The Adviser seeks to identify and invest in stocks of higher quality companies at reasonable prices. Higher quality companies are those judged to have sustainable business models, financial stability, prudent capital management, and financial statements that indicate past economic success. The Fund's equity investments are diversified across economic sectors.

**Fixed Income**—Fixed income holdings are generally those issued by either the US government and its agencies, or investment-grade securities of higher quality US corporations. The Adviser seeks to add value through duration management, yield curve strategies, sector rotation, and individual security selection.

### Environmental, Social, and Governance Guidelines

The Fund evaluates financially material ESG factors as part of the investment decision-making process, considering a range of impacts they may have on future revenues, expenses, assets, liabilities, and overall risk. The Fund excludes companies with significant exposure in specific products or services, as well as those deemed to have substandard ESG performance as described in the Prospectus. The Fund also utilizes active ownership to encourage more sustainable business policies and practices and greater ESG transparency. Active ownership strategies include proxy voting, dialogue with company management and sponsorship of shareholder resolutions, and public policy advocacy.

Performance data for three years and longer is annualized. Performance represents Fund shares indicated at net asset value (NAV). The index returns reflect neither the deduction of fees and expenses associated with a mutual fund nor the impact of taxes. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and NAV will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Future performance may be lower or higher than the performance quoted. To obtain performance information current to the most recent month end, please call 1-800-282-8782.

**FUND RISKS**

Equity securities (stocks) are generally more volatile and carry more risk than fixed income securities (bonds) and money market investments. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater returns over long time periods than fixed income securities. Compared to stocks, bonds generally offer a relatively stable level of income. However, like stocks, bonds will fluctuate, thereby incurring the likelihood of principal gain or loss. The Fund is comprised primarily of equity and fixed income securities and is subject to market risk. Stocks may decline due to general market and economic conditions or due to company specific circumstances. The Fund's ESG screening criteria may affect the Fund's exposure to certain companies, sectors and/or industries, and may adversely impact the Fund's performance depending on whether such companies, sectors and/or industries are in or out of favor in the market. Both the ESG profile of a company or industry or the investment Adviser's judgement of a company or industry may change over time. The investment Adviser's judgement regarding the ESG screens may depend upon information that could be incomplete, inaccurate, or unavailable, which may adversely affect the ESG analysis.
