## INVESTMENT OBJECTIVE & STRATEGY

The Fund seeks long-term capital growth through an actively managed portfolio of stocks. The Fund's investment process focuses on security selection and portfolio construction. The Adviser's goal is to construct a diversified portfolio of reasonably valued stocks of higher quality companies.

### Security Selection

The Adviser seeks to identify and invest in companies that exhibit higher quality business and financial characteristics. The Adviser considers higher quality companies to be those judged to have sustainable business models, financial stability, prudent capital management, and financial statements that indicate past economic success. Using both quantitative and qualitative assessments, the Adviser seeks to highlight firms for investment primarily on the basis of business stability, profitability, balance sheet sustainability, accounting practices, and growth opportunities. The goal is to identify companies that exhibit a quality profile judged by the Adviser to be desirable relative to the universe and each company's sector peers.

### Portfolio Construction

The Fund's investments, in aggregate, possess portfolio characteristics the Adviser judges to be superior to those of the mid cap market. The Fund is broadly diversified across economic sectors.

### Environmental, Social, and Governance Guidelines

As part of the investment decision-making process for the Fund, the Adviser evaluates how financially material environmental, social, and governance (ESG) risks and opportunities may affect a company's revenues, expenses, assets, liabilities, and overall risk. The consideration of ESG risks and opportunities in investment decision-making is referred to as "ESG integration." The Adviser considers "financial materiality" as it is understood in Generally Accepted Accounting Principles — information that would influence the judgment of an informed investor. The integration of ESG risks and opportunities is often a subjective exercise and may differ depending on the characteristics of the asset class. Active ownership activities include proxy voting, company engagement, shareholder resolutions, and public policy advocacy. While the Adviser integrates ESG risks and opportunities into its investment decision-making, the Fund is also subject to ESG screening criteria. ESG screening criteria require the Adviser to exclude companies with significant exposure to specific products or services: alcohol production, coal mining, factory farming operations, gambling, handguns, nuclear power fuel cycle, prison operations, tobacco manufacturing, and weapons systems.

## FUND RISKS

Equity securities (stocks) are generally more volatile and carry more risk than fixed income securities (bonds) and money market investments. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater returns over long time periods than fixed income securities. The Fund is comprised primarily of equity securities and is subject to market risk. Stocks may decline due to general market and economic conditions or due to company specific circumstances. The Adviser's integration of ESG (Environmental, Social, and Governance) risks and opportunities may cause the Fund to perform differently from a fund that uses a different methodology. ESG integration may cause the Fund to forego or differently evaluate investment opportunities than a fund that uses a different investment research methodology. The Adviser votes proxies in a manner it believes is consistent with the Fund's long-term investment focus. Such votes may not always be consistent with maximizing short-term performance of the issuer. The Fund's ESG screening criteria may influence the Fund's exposure to certain companies, sectors, and/or industries, which may adversely affect the Fund's performance depending on how such companies, sectors, and/or industries are performing relative to the market. In addition, the Fund may gain indirect exposure to businesses or activities inconsistent with the Fund's ESG-related criteria in a variety of ways, including one company's investments, joint ventures, etc.

## ADDITIONAL DISCLOSURES

Weights are subject to change. Please visit [www.bostontrustwalden.com](http://www.bostontrustwalden.com) for a complete fund portfolio holdings list. <sup>1</sup>The Fund's performance is measured against the Russell Midcap® Index, which is a subset of the Russell 1000® Index and represents the mid-cap segment of the US equity universe, includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. <sup>2</sup> Reflects the expense ratio as reported in the prospectus dated May 1, 2025. The Fund has no sales charge and the gross expense ratio is 1.02% and the net expense ratio is 1.00%, due to expense reimbursement/waiver. The Fund's Advisor has contractually agreed to limit fees and waive certain expenses through May 1, 2026. <sup>3</sup> Definitions: Sales and ROIC (Return on Invested Capital) Variability measure fluctuations in the respective metrics of the Fund or benchmark companies during a given period. Price/Earnings Ratio measures a company's current share price compared to its per-share earnings. Free Cash Flow Yield excludes the financials and utilities sectors.
